**Subject:** Fwd: GKM LTM Team 2 Schedule

Have initiated sampling this AM with two teams - Team 1 is working Upper Animas today and Team 2 is working the San Juan from the Four Corners toward Lake Powell. The ADCP flow device arrived on Friday and START put it through its paces on Saturday. Seems to work well, so we sent it with Team 2 for the deeper areas that aren't wadeable.

See below for how the coordinations with UT for splits worked out. Should be able to get to the NM sites by Wednesday if everything goes according to plan. Do we need to take splits in NM and if so, who are the contacts there?

Thanks for all the support on getting things opened up in R6. Let us know if the Shiprock location becomes a go for later in the week... All we need from Navajo Nation would be an escort to the sampling location, unless they have designs on split sampling. I'm thinking Thursday for that location.

Mark Blanchard is feverishly working on the QAPP/SAP revisions to incorporate these new sites, but that document is otherwise ready to go I believe. I am working on an incremental TDD amendment today for START to cover everything we've done and we're doing this week.

**Subject:** GKM LTM Team 2 Schedule

Steve-

We coordinated with Bradley Martin (TechLaw) for the split sampling at the 3 sites in Utah (Ute Mountain).

He has a guy flying into Durango on Monday to meet up with us, but he will need time in the morning to gather supplies.

I propose we change our schedule for the sampling sites so that we start at SJ4C first thing tomorrow.

(This site is in CO and not one of the sites where TechLaw is splitting.)

That way we can begin sampling tomorrow while he is gathering supplies.

We then can meet up with him and sample at SJMC Monday afternoon.

Then Tuesday we plan to sample at SJBB and SJIN (Lake Powell).

This is the reverse order of what we previously planned for Team 2, but it alleviates any party waiting around.

Also, to eliminate any possible conflict of interest with these 2 TechLaw people, I plan to have Emily Yadacus collect GPS data and flow data at these 3 Utah sites.

A WESTON START will collect the samples at these 3 sites and this TechLaw guy can pull his splits.

Please let me know if you have any comments or other ideas.

Thanks-

**Jeff Bryniarski**
